space becomes place

# Aeris Numo Task

# An office chair, just as flexible as we are.

Many advantages. Simply great.

---

**Finally a chair with the right adjustment that is unique to you.**

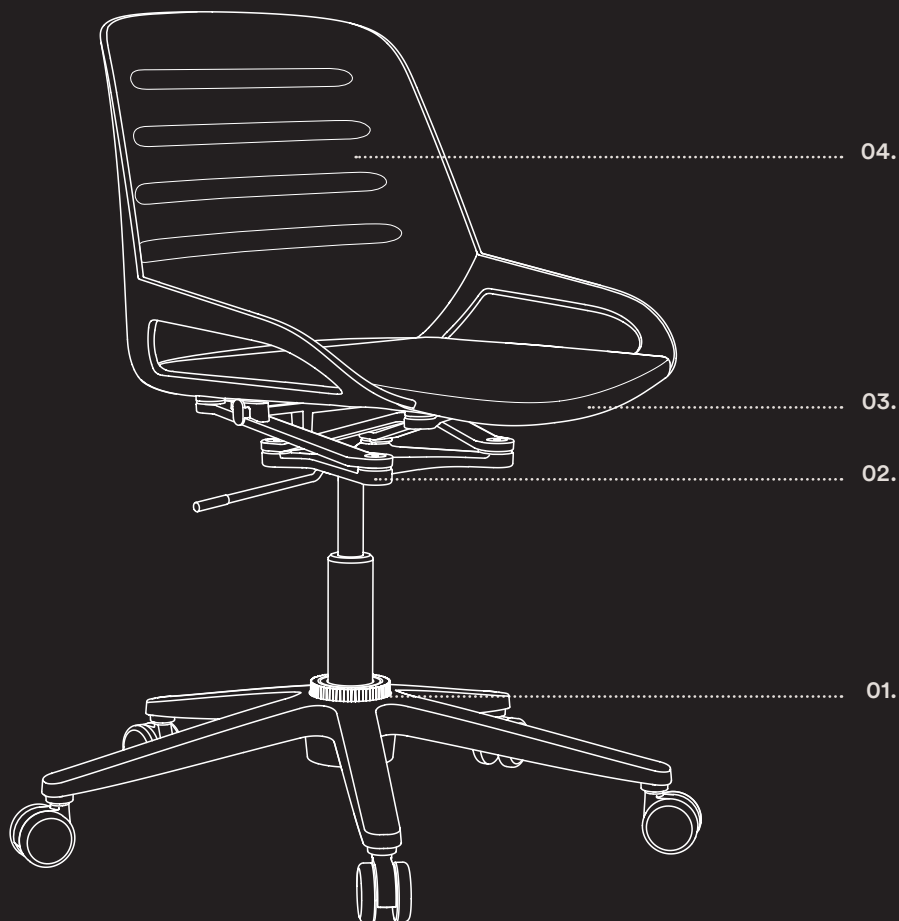

The patented Self Adjusting Motion (SAM) element adjust to your weight automatically, allowing comfortable movement in all directions.

**Flexible to use.**

Whether at the desk in the office, in the kitchen or in the lounge. Timeless design that keeps you fit for everything life has to offer after work.

**A green office chair with many colours.**

The seat cushion covers are made from old plastic bottles, fishing nets, etc. We are cleaning up with our sustainable materials – Made in Europe.

- 01. The patented Self Adjusting Motion (SAM) element allows every user the same mobility forward, backwards and sideways - regardless of weight.
- 02. With its patented kinematics, the Aeris Numo Task follows the forward and backwards movements of its user.
- 03. The front flex zone of the seat cushion prevents a feeling of pressure at the front edge of the seat.
- 04. The retrofittable back rest cushion simply clips into the backrest. The cushion provides support without restricting movement.

#### Adjustment Options:
