space becomes place

Noti.Cactus

Cactus — a family of racks and small tables, where technology meets solutions inspired by nature.

The highlight of the Cactus furniture collection is a sculpted base, inspired by the shape of the African milk tree (*Euphorbia Trigona*). The impressive base is made by extruding an aluminium alloy into a mould designed by Piotr Kuchciński.

The variable-length three armed aluminium shafts serve as bases for tables and supports for shelf racks. The repeated aluminium elements, turned at different angles, create a dynamic composition that liven up the space.

Cactus is a perfect combination of outstanding design, functionality and an approach focused on interior arrangement. With a broad range of configuration and customisation options, the collection blends seamlessly with a variety of interiors, from living rooms to office areas, defining and/or delineating the space.

Technical description

Tables

Top	Melaminated particleboard, lacquered mdf board, mdf board, covered with natural oak veneer, lacquered, 100% recycled plastic — choose from standard (leniwiec, leniwiec biały, bytom) and special colors (mare black)
-----	---

Base	Made of extruded aluminium, profile cut to size and powder coated
------	---

Shelving units

Top	Lacquered mdf board, mdf board, covered with natural oak veneer, lacquered
-----	--

Partitions	Made of extruded aluminium, profile cut to size and powder coated
------------	---

Additional information	The drawing and table/shelving tops finish may vary and are not subject to any complaints. The tables and shelving units are ready for assembly by the customer (Allen key included)
------------------------	--
