

Kap  
Meeting Chair

asset  
space becomes place

# Noti.Kap

Kap is a chair collection that fits naturally into a wide variety of spaces from home offices to conference rooms. Its ergonomic design and endless possibilities for colour combinations merge outstanding comfort with a distinctive original design.

---

The defining feature of Kap is the separation of the seat and backrest joined by a unique dot-shaped detail. The collection includes both soft upholstered versions and polypropylene versions that allow colours to be freely combined. Together with a wide selection of bases this offers extensive configuration options making it easy to tailor the chair precisely to virtually any interior.

---

Kap combines uncompromising comfort with responsible design. Its ergonomics refined through extensive prototyping and its flexible backrest which follows the natural movements of the body support proper posture and active sitting. The carefully engineered glue-free construction simplifies servicing. Meanwhile, the responsible production process gives a second life to components with naturally occurring colour variations created during material colour changeovers in the injection-moulding process using them as the base for upholstered versions.

---

The collection has been designed to fit seamlessly into a wide range of environments including home offices, cafeterias, conference rooms and executive offices.
